

Planit 10 Test Cases

Jayden Goncalves - ausjayag@gmail.com

Due to time constraints, you only have time to complete automation testing of 10 scenarios for this new website. <https://jupiter.cloud.planittesting.com/#/> Determine 10 test cases which reflect the priorities of this website.

The priorities of the website are to provide an easy to use interface for consumers to purchase the toys on selection. Additionally, the website's secondary function is to gather feedback from consumers.

Test Cases:

1. Test case objective: check 'start shopping' link function.

Steps:

1. Using the cursor press, the start shopping button.

Output: page changes to show <https://jupiter.cloud.planittesting.com/#/shop>

2. Test case objective: test 'contact' link function.

Steps:

1. Using the cursor, press the contact menu item.

Output: page changes to show <https://jupiter.cloud.planittesting.com/#/contact>

3. Test case objective: test feedback form submission with following data:

Forename: John

Surname: Example

Email: john.example@planit.net.au

Telephone: 0212345678

Message: Tell us about it.

2. Press Submit.

Output: page displays confirmation message.

4. Test case objective: test feedback from error checking with the following data:

Steps:

1. Do not enter anything.
2. Press submit.

Output: page displays error message and asterisk on required form items.

5. Test case objective: Selection of buy item adds item to cart.

Steps:

1. On shopping page (<https://jupiter.cloud.planittesting.com/#/shop>) press the buy button on item no.1 (Teddy Bear).

Output: Cart icon updates with item number 1.
